

HELP THE FIGHT: Join The Beat Parkinson's Today X GutID® Microbiome Study

Help Unlock the Link Between Gut Bacteria & Parkinson's

The microbiome is the vast ecosystem of bacteria living inside each of us, primarily in your gut. Scientific research suggests a strong link between gut bacteria and Parkinson's.

Beat Parkinson's Today is teaming up with GutID to further explore this connection.

GutID's new high-resolution bacterial analysis technology, could uncover deep insights with the potential to impact Parkinson's through:

- Better diagnostics
- New therapeutic treatments
- Disease prevention opportunities

Please Participate!

To make this pilot study successful, we need volunteers to provide stool and saliva samples for analysis, using at home collection kits shipped directly to you. Your participation helps generate the data required to power the study and findings.

Free GutID® Report For Volunteers!

As a thank you, all study participants have the option of receiving a complimentary GutID Report, giving a detailed look at their own gut health.
